

Project Development Phase Performance Test

Date	13 May 2023
Team ID	NM2023TMID02223
Project Name	Industrial workers health and safety system based on the IOT

Model Performance Testing:

Project team shall fill the following information in the performance testing template.

Parameter	Values	Screenshot
Metrics	<p>Wowki Execution time and Output screenshot</p> <p>Or</p> <p>Python accuracy of prediction and output screenshot</p>	 <p>The screenshot displays the Wowki IDE interface. On the left, a C++ code editor shows a sketch for an ESP8266 module. The code includes comments and logic for connecting to a cloud service, sending data, and receiving responses. On the right, a simulation window titled 'Simulation' shows a virtual ESP8266 module. The module's status is 'On', and it displays a temperature of 1.0°C and humidity of 48.1%. The console output shows the module sending data to the cloud and receiving a response.</p>
